

Hello from !

Did you know, according to a 2008 Pew Research Center study, 66% of Americans have shopped online? Wow!

Although online shopping reaps many benefits, this growing trend can devastate the local economy when used exclusively. Business can be taken away from the hardware store down the street or the shoe store in the mall, resulting in lost jobs and empty buildings.

However, YOU can make a difference! Take a stand with SES by joining in our “**We Support Our Local Brick and Mortar Businesses**” pledge. Whenever we can, we will buy from a local business. Even if this purchase is made online, it will be made from a company with a storefront down the street or across town.

Of course, SES believes in the Internet and the benefits of e-commerce as we serve many of our own customers through sesonline.com. However, making online purchases from us still come from your neighborhood SES location, not a faceless mega warehouse in a city you’ve never heard of.

We encourage you to think about the resources near to where you live and work before taking an easy way out on a future purchase. Let’s work together to keep our local businesses standing so they, in turn, can help keep all of us in business too.

Best regards,

Your SES Sales Team
