

October is National Fire Prevention Month!

Team up with SES to help spread the word about **National Fire Prevention Month**, the time of year when we are all reminded of the importance of learning fire safety and prevention. It's also the perfect time to encourage your customers to carefully look at their own fire prevention needs.

Did you know house fires start in an instant and spread in seconds, often times leaving less than two minutes to escape? According to some officials, having working smoke alarms can decrease fatalities in fires by nearly half, which is why it is so important to take the time to have smoke alarms properly installed as well as have escape routes planned for your home and business.

By informing your customers of their options you are opening the door to selling more fire products. And as always, SES has whatever you need to answer their needs. Just give us a call today for more details about our complete line of fire safety products.

Best regards,

Your SES sales team
